## Who Are We?

---

Born in the era of new technology, **Dot Dot Holdings Sdn Bhd** is a dynamic and energetic business that takes advantage of Information and Communication Technologies (ICT) to help and support other businesses grow in this ever challenging millennium.

**Dot Dot Holdings Sdn Bhd** was raised and trained to offer the best service in Information Technology in the fields of **Online Database Marketing**, **Creative Web Design** and **Advanced Technology Support**. We also believe that continuous technical skills development is crucial to the success of any businesses; **Dot Dot Holdings Sdn Bhd** also embarks on **ICT Training** to increase the business competitiveness in this fast-moving world.

## Mission Statement

We are eager to help and support **YOUR** business grow and be equipped with all the ICT skills and knowledge the industry can offer, as the future will rely heavily on ICT to move forward in this new millennium.

## Motto

“Creative Business”

Our motto brings you the best in creativity for your business.

### Dot Dot Holdings Sdn Bhd

- Online Database Marketing
- Creative Web Services
- Advanced Technology Support
- ICT Training

## What We Can Do.. For You..

---

**Dot Dot Holdings Sdn Bhd** envisions to be the most sought after ICT player in the millennium. To achieve this, we learn from other players and we do it better. Why? Because every business needs the better solution. Every work that we do for our client is different from how other people do it to their clients.

### Online Database Marketing using bizOneGo

Businesses need clients to keep existing. In other words, businesses need continuous income to be worthwhile. That's a Fact. Because of this, we have to constantly be in touch with our clients and keep them informed of our latest activities, products and services. But keeping in touch with them using currently available tools such as email and SMS proves to be too much work, especially when you have thousands of clients. Imagine sending them a product update. You only have two choices: 1) sending them a mass email to a group email address where all emails use the same greeting "Dear Valued Customers" or 2) sending them a personalized email with "Dear <Insert Name Here>". The later will cost you countless hours of sending email one by one.

With bizOneGo, we solve this problem by allowing you to send PERSONALIZED messages to thousands of your clients using Email and SMS<sup>1</sup>. Each and every one of your clients will receive "Dear <Name>", making them feel that the message is personally sent to them rather than to the masses. With personalization, they will surely give time to read your messages. It will not be considered SPAM (as long as you blast it to your own contacts).

#### Online Database Marketing

- bizOneGo – Business At Just One Go! (PERSONALIZED Email & SMS to thousands of your Customers, at Just One Go!)

---

<sup>1</sup> SMS credit is required to send messages using SMS

## Creative Web Services

Apart from connecting with your clients using bizOneGo, we believe in supporting and helping our clients through our **Creative Web Services**, which includes the following creative services:

- Responsive website development
- Web-based Application Development
- Customized portal and website development
- E-Commerce Website Development (Website with Shopping cart & Payment Gateway)
- Corporate Website Design and Development
- Web Consultancy Services
- Web Hosting and Positioning (SEO)
- Facebook Advertising (Boost Post & Advertise Page)
- Web Banner Advertising
- Community Portal Development

As you can see, the **Creative Web Services** is designed to move YOUR business from the traditional “brick and mortar” business environment, which is limited to a particular geographical location to a virtual business environment, opening YOUR door to a multitude of clients worldwide.

Moving a business into the virtual world is something not many businesses want to jump into right now – which is why many businesses that are not online, are off. We at **Dot Dot Holdings Sdn Bhd** on the other hand want YOU to jump into the ICT bandwagon and make more wealth now and in the future.

## Advanced Technology Support

Once you are ready to embark on something new and exciting, we are there to support you. In line with our **Creative Web Services** is our **Advanced Technology Support**, a service to keep you moving forward in your businesses.

This service is designed to troubleshoot, maintain, repair and upgrade any computer related problems including the dreaded virus attacks. We also consult on networking, be it at home or at your office. Other than that, we consult you on computer specifications before you procure any computers or servers for your business so that you will make the right decision at the right time.

In short, our Advanced Technology Support Service includes:

- Domain Name Services
- Hosting Services
- Anti-virus Reseller
- Software Reseller
- Computer Troubleshooting
- Hardware Maintenance
- Hardware Repair
- Hardware Upgrade
- Hardware Sales
- Networking

## ICT Training

**Dot Dot Holdings Sdn Bhd** always believes that to be in the front seat of any business, one has to have the skills and know-how to compete with others in this fast-moving world. Therefore, a part of OUR business is to give ICT training to you so that you can take advantage of it to boost YOUR business. In line with our core business which is web-based application development, we have developed our core training program in PHP, MySQL & jQuery. We train you on what we do every day. Doesn't that give you an edge?

Other than that, our ICT training includes basic computer training, Internet training, Content Management System (CMS) Training, Microsoft Application Training, Adobe Application Training and a lot more. Just tell us what you need and we'll deliver!

If your requirement is to build a web-based application through training, we can cater by providing "coaching and mentoring" sessions where the goal is to develop a web-based application that is usable at the end of the session. Students will not only gain valuable knowledge in PHP, MySQL & jQuery but also in the end, they will have a basic system which they can improve further.

In short, this part of our business provides you the following:

- PHP 8, MySQL 8 & jQuery Training
- Coaching and Mentoring based training
- Joomla 3.0! Training
- Basic Computer Training
- Internet Training
- CMS Training
- Microsoft Application Training
- Adobe Application Training
- Other trainings that suites you

### ICT Training

- PHP7, MySQL & jQuery Training
- Coaching & Mentoring
- Joomla 3.0! Training
- Basic Computer Training
- Internet Training

# Our Core Products & Services

## Responsive Website Design

With the increase of smart phone users, there is a very high probability that people view the website using mobile browsers. Alongside social media use, news and information are shared via mobile phones. It is very much disturbing to open up a link and the website is too small to be read.

A solution to this problem is to build the website with responsive design. This is where our expertise comes in. The same website above, when redesigned for mobile browsers, looks like this. Note how easy it is to read the wordings on the website.

The following shows how responsive websites look when viewed using desktop and mobile devices.

# Responsive Web Design – From Old To New!

We've done a lot, turning old style designed websites into responsive websites. Here's one showcase. The old website of Pejabat Daerah & Tanah Jasin, Melaka was converted to be responsive to desktops, mobile phones and tablets.

# Update

We have recently upgraded PDT Jasin's website into a new look in 2022, encompassing many new trendy features. This site is available at <https://pdtjasin.gov.my>

# Web-based Application Development

## Customized Information Management System

We are experts when it comes to web-based application development. The applications that we built are highly used by various government agencies to improve their productivities and delivery system for their clients.

The following are some of our esteemed projects with our clients.

### Tabung Pembangunan Usahawan Negeri Sembilan (TUNS)

Tabung Pembangunan Usahawan Negeri Sembilan is a web-based application developed for Perbadanan Kemajuan Negeri Negeri Sembilan (PKNNS). This system is built for entrepreneurs to apply for funds provided by the government of Negeri Sembilan. The administrative module is developed to be user friendly and easy for the administrators to select, review and approve applications from all over Negeri Sembilan.

Sistem Pengurusan Latihan (SPL) INSPEN is a web-based application developed for Institut Penilaian Negara, Jabatan Pengurusan dan Penilaian Harta (JPPH), an institute under the Ministry of Finance Malaysia.

This system is developed to manage courses organized by Institut Penilaian Negara. It allows participants to apply for courses and course managers to approve these applications. The course managers can manage schedules, assign participants, select lecturers and many more to a course. At the end of the day, the lecturers can also apply for honorarium for the courses taught.

## Sistem MyCARE

The screenshot displays the 'Senarai Klien' (Client List) page in the MyCARE system. The page features a sidebar with navigation options under 'PENGURUSAN' (Management) and 'SISTEM' (System). The main content area shows a table with 13 rows of client data. The table columns are: No, Nama, No Kad Pengenalan, Umur, Tarikh Mula Pengawasan, Pegawai Penyelia, and Tindakan. Each row includes a 'Tindakan' (Action) column with 'Lihat' (View) and 'Padam' (Delete) options.

Sistem MyCARE is a system built for Agensi Anti Dadah Kebangsaan (AADK), to manage data of drug-addicts in Negeri Sembilan. With correct information, an informed decision can be made to better manage the rehabilitation of drug-addicts.

There are many more customized web-based application system developed for various esteemed clients. Please contact us for more information, or to engage us for your projects.

# Products

## bizOneGo

bizOneGo, short for Business at One Go or “Biso Nego” in Kelantanese (which means Power Business), is the world’s first Integrated Customer Relationship Management System (CRM) which combines Email and SMS as a means of communication between businesses and clients. bizOneGo enables businesses to communicate with all of their clients and staffs by sending personalized messages.

Among the things that you can do with bizOneGo are:

- a) **Communicate with all or some of your clients in a group** – you no longer have to select clients one by one. Just import a list of clients and assign it to a group. When sending, just select the group that you want the personalized message sent to, and the rest is history.
- b) **Create Marketing Campaign** – you can create a set of messages to be sent to your clients at pre-set intervals, automating mundane tasks but still get people to know your products, bit by bit.
- c) **Make Messages Viral, Easier** – you can tell the recipient to forward the message to their list of friends. In a short time, everyone will know what you wanted to let people know.
- d) **Send Birthday Messages, Automatically** – the system can send birthday messages to your clients without you knowing it. Your customers will love you for this!.

Below is a screen shot of bizOneGo.

The screenshot displays the bizOneGo home screen with the following sections:

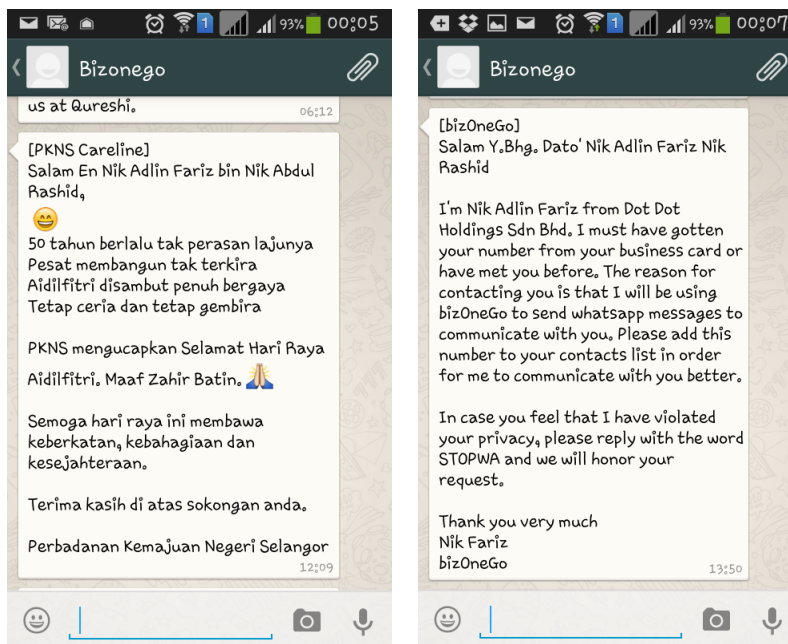

- 10 Kumpulan Tertinggi**: A horizontal bar chart showing the top 10 groups. The highest group is 'KuponParking.com' with 34 members.
- Statistik Mengikut Peristiwa**: A pie chart showing event statistics: Deepavali (80%), Chinese New Year (19%), and Hari Raya Aidilfitri (1%).
- Pengurusan**: A sidebar menu with options like 'Pengurusan Kumpulan', 'Pengurusan Pelanggan', and 'Pengurusan Promosi'.
- Pengedaran**: A sidebar menu with 'Pengedaran Promosi'.
- Inbox SMS Terkini**: A table of recent SMS messages with columns for No, No Tel Bimbit, Pengirim, and Identiti.
- Inbox WhatsApp Terkini**: A table of recent WhatsApp messages with columns for No, No Tel Bimbit, Pengirim, and Identiti.
- Senarai Audit**: A sidebar menu with 'Log Email', 'Log WhatsApp', 'Log SMS', 'Log Inbox SMS', 'Log Mesej Harian', and 'Log Sistem'.
- Reminder**: A section with status indicators for 'SMS', 'Email', 'WhatsApp', and 'Individual'.
- Total Messages Sent / Credit Balance / Credit Limit**: A summary table showing 221 SMS sent, 148/2952 credit balance, and 187/29813 credit limit.
- Jumlah Pelanggan: 187**: A badge showing the total number of customers.

Fax : 03-2780 2100

## Problem Statement

Perbadanan Usahawan Nasional Berhad (PUNB) is a government arm to help entrepreneurs achieve success in their businesses by providing loans and training to companies. One of their major problems was not being able to communicate effectively with their participants. A lot of training programs that they organize had low participation. They had to manually call and email each participants to inform about upcoming news.

## Our Proposed Solution

As the main problem is communication, our solution provides effective communication to all participants via bizOneGo – a comprehensive and integrated web-based application which combines email and SMS in one platform. With this solution, participants to their training programs increased, enhancing the skills of their participants at par with their goals and objectives.

## All-in-One Website Design

If you want your business to grow exponentially, there is no better way than to build an all-in-one website. An all-in-one website encompasses a responsive website, bizOneGo, eCommerce and social media marketing.

One of the websites that we do is **Raqtive** – an online store selling #sportshijab. This responsive website can be viewed at <http://raqtive.com>. With eCommerce integration, visitors will be able to select from the number of #sportshijab available, put them in a shopping cart and then pay using credit card or debit card. They no longer have to send proof of payment as confirmation of payment is done by the payment gateway provider. Once a transaction is completed, both the seller and buyer will get notified through email.

With bizOneGo integration, once a visitor registers and submits relevant data such as name, email address, mobile number, birthdate and shipping address, he or she will be registered with bizOneGo. bizOneGo then kicks in and performs a number of automated tasks such as send a thank you email to the buyer, and a series of predesigned emails to entice him or her to buy more and more from the website. On the buyer's birthday, bizOneGo will send a birthday message, making him or her feel special (and probably buy more).

With Social Media Marketing, you can use Facebook, Instagram or twitter to market your products to a larger audience. Facebook is well known to create awareness by building a page for your product. Using advertising techniques such as "Boost Post" or "FB Ads", you can gain a lot of views and likes from your potential clients. Those who have interest in your product will visit the site and learn more. Those who are really interested in your product will then register and buy.

Do you see the all-in-one business life cycle?

If you do, visit the site and experience for yourself. Go to <http://raqtive.com> and buy a #sportshijab today!

Dynamic · Unique · Exciting  
**Be Raqtive!**

Nowadays, people are becoming increasingly aware of the importance of living healthy lifestyles and hence, take the effort to exercise regularly and engage in a variety of recreational activities and sports. Thus, the need for appropriate and comfortable sports attire is highly important as it helps to boost people™ confidence when performing these activities.

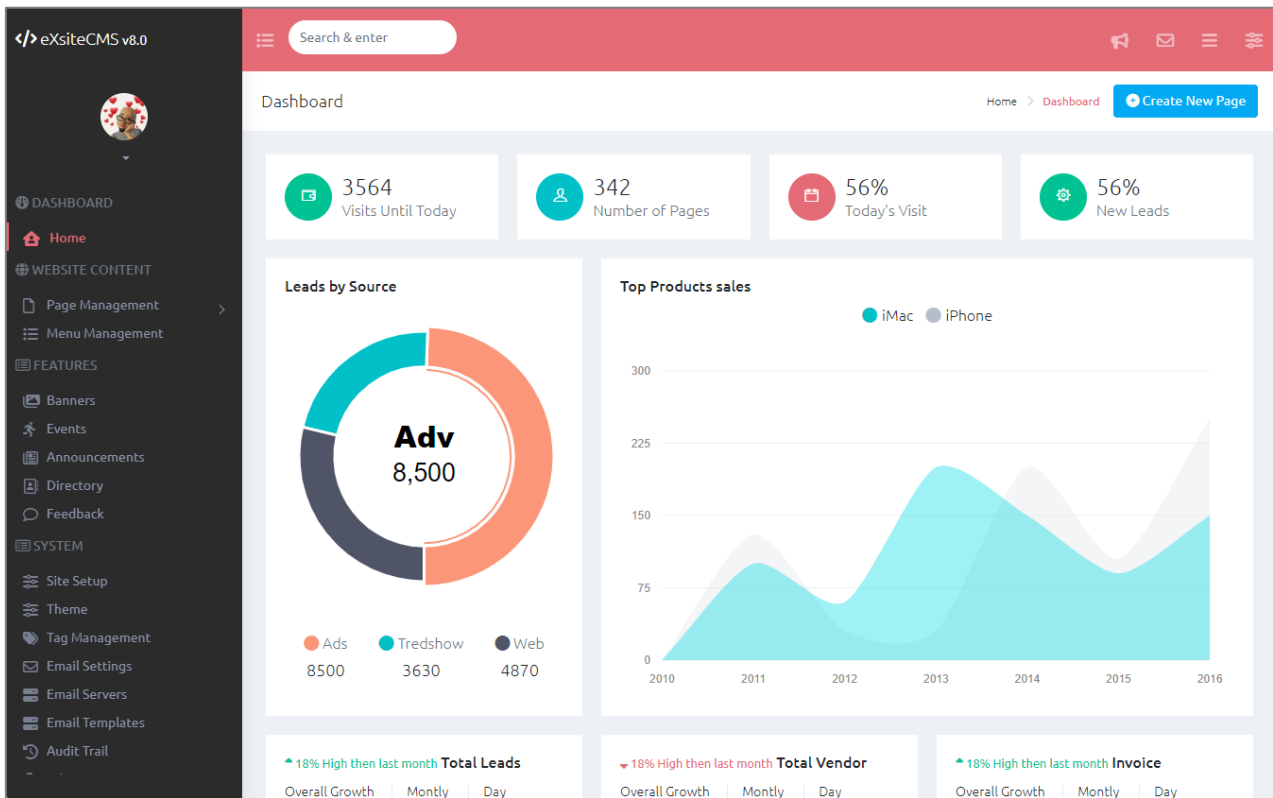

This is also true for Muslim women who wish to be active and at the same time preserve their modesty while looking beautiful. Recognizing this need, Triad Resources presents a variety of sportswear products for the Muslim women. Through our Raqtive product line, we offer sports hijab and sleeves, especially for active women.

Our products are produced with high quality microfiber sports fabric created to fit the need of today's contemporary woman. We assure that you will be satisfied with the quality of Raqtive products!

## eXsiteCMS v8.0 – Content Management System for Responsive Websites

One of our special products is eXsiteCMS. It is a Content Management System (CMS) engine developed in-house and is available on the PHP platform. As its name describes, eXsiteCMS allows any content of a website to be user customizable. This is achieved through the use of Administration modules to edit the content. The content is edited through a web-based editor similar to Microsoft Word. The new eXsiteCMS is a responsive admin module made for responsive websites.

eXsiteCMS v8.0 Page Administration Module

The modifiable content is viewed on the front part of the website, complete with top headers and bottom footers and menus.

The advantage of using eXsiteCMS is that our clients do not need to revert to us if they need to update or modify any parts of the website. This is because they can take advantage of the administration module to change any content parts themselves, at anytime, anywhere.

## Features

Every website or portal that we develop is unique as we value our customers as unique. Our websites are creatively designed to portray a professional look and feel, and integrated with dynamic content, the website is a complete professional system. Among the features included in most of our websites are:

- Page Management
  - Create New Page
  - Create New Block
  - Assign Block to Page
  - View All Pages
  - View All Blocks
  - Index Page
- Menu Management

If you have been having trouble finding and sharing your documents, then this application is best suited to solve that problem. Hosted in your local network or the internet, your staff can easily upload any kinds of files that you allow. They can then share the files to other departments and staff and even make the files permanent – they appear to all who logs in to the system. Users can also search for files with ease and ask permission to download them to their folder.

A scenario where this system comes in handy is when your Human Resource Department needs to share the company policies and guidelines. Instead of having to email or print the document to each of the staff, they simply upload it to the system and make it a permanent folder.

When users log in to the system, they'll be able to see the documents and preview them online – saving your Human Resource department time, effort and money.

## Sistem Aduan Pelanggan / Complaints Management System

One of our products that have helped organizations become better and more productive is the Sistem Aduan Pelanggan or Complaints Management System. It is used by Customer Service Division of Perbadanan Kemajuan Negeri Selangor (PKNS), Jabatan Kesihatan Negeri Melaka and just recently, Majlis Agama Islam Selangor has awarded us the project to implement a complaints management system for them.

Through the use of Sistem Aduan Pelanggan PKNS, PKNS has won the Anugerah Pengurusan Pejabat dan Pentadbiran Cemerlang (APPC) Pentadbiran Kerajaan Negeri Selangor 2015 under the Customer Management Category. Not only that, PKNS has also won the award for the same category in 2013.

This showed that with the right tools and technologies, we can achieve higher productivity, which turns into better service to the customers.
